

Design checklist for engineering handoff

- Set up design walkthrough meeting with engineers
- Address open questions in the design file, with eng notes
- Prototype walkthrough
- Interaction annotations and flows are documented
- Images, icons are noted in the design file and where to find them
- Design system components are used and referenced easily
- Error states are designed and documented
- Offline states are designed and documented
- Empty states are designed and documented
- First time user experience states are designed and documented
